Research meeting brief

Generated from the same filtered dataset as Research results and the Excel workbook.

Filters: Site: Animal Cell Bank · Treatment group: Standard protocol · From: 01/09/2026 · To: 11/10/2026

Generated	Timing profile versions
12/10/2026 02:11 UTC+7	1

01 Results at a glance

Activated embryos	Reached Shield	Promoted fish	All living fish
192	168	124	112

Embryo-to-cloned-fish workflow

Step	Count	% previous	% activated
Activated	192	100.00%	100.00%
Reached Shield	168	87.50%	87.50%
Reached Day 1	148	88.10%	77.08%
Promoted	124	83.78%	64.58%
Alive Fish	112	90.32%	58.33%

The workflow counts fish promoted from embryos. The living-fish total above includes all fish in the selected dataset.

Embryo outcomes

Measure	Result
Experiment batches	8
Reached Day 1	148
Normal embryos	92.00%

All fish status

Measure	Count
Dead	12
Frozen	6
Discarded	4
Normal / abnormal	110 / 14

Scope and interpretation

Figures follow the stated filters and are descriptive, not statistical conclusions. — or Unknown means unavailable, not zero. Vital status and condition are separate dimensions and must not be added together.

Incomplete source data: review data-quality details in Research results before drawing conclusions.

02 Items for discussion

Rows are selected by the criteria below for immediate follow-up. The full analytical report contains every row.

01 / Longest observation gaps

Showing 5 of 500 rows · most missed days first

Fish	Last observed	Missed days
KU-ZF-2026-042_1_500	01/10/2026	500
KU-ZF-2026-042_1_499	01/10/2026	499
KU-ZF-2026-042_1_498	01/10/2026	498
KU-ZF-2026-042_1_497	01/10/2026	497
KU-ZF-2026-042_1_496	01/10/2026	496

02 / Largest checkpoint timing deviations

Showing 5 of 500 rows · absolute median deviation · positive = late / negative = early

Group	Stage	n	Median (hours)
AB / SCNT-500	16-cell	40	-50.00
AB / SCNT-499	8-cell	40	-49.90
AB / SCNT-498	4-cell	40	-49.80
AB / SCNT-497	2-cell	40	-49.70
AB / SCNT-496	16-cell	40	-49.60

03 / SCNT and control groups

Showing 5 of 500 rows · largest sample first · not a success ranking

Arm / stage	n	Normal	Abnormal	Normal %
SCNT / 16-cell	599	589	10	98.33%
CONTROL / 8-cell	598	588	10	98.33%
SCNT / 4-cell	597	587	10	98.32%
CONTROL / 2-cell	596	586	10	98.32%
SCNT / 16-cell	595	585	10	98.32%

Further review

Group, stage and age-specific survival details are available in the full analytical report. Excel and R CSV downloads provide data for further analysis.
